

SHASHANK GOWDA NB

Software Development Engineer (SDE-1) — Backend | APIs | Cloud

+91-7996279164 | shashankgowdanb50@gmail.com | LinkedIn: <https://tiny.one/linkdinsk> | Bengaluru, India

PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience building backend systems, REST APIs, and AI-integrated applications. Independently shipped a platform that reached 4,000+ users and built a production system used by 800+ users. Proficient in Python, JavaScript, SQL, Docker, Kubernetes, AWS, and CI/CD pipelines.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++, SQL

Backend & APIs: REST API Design & Development, Node.js, Authentication & Authorization, API Integration

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Databases: MySQL, SQLite

Frontend: React.js, Next.js, Flutter, HTML, CSS

AI & Data: Google Gemini API, AI-Integrated Application Development, Data Processing Pipelines

Tools & Practices: Git, GitHub, Postman, VS Code, Application Security Fundamentals, Computer Networking

EXPERIENCE

Freelance Software Developer — Technoksha (Client Project) · Remote 2026 – Present

- Design and develop backend services and REST APIs for client projects, owning delivery from requirements through deployment.
- Implement authentication, database workflows, and core application functionality independently.
- Manage client communication, debugging, and project timelines end-to-end as sole developer.

Software Engineering Virtual Experience — JPMorgan Chase & Co. (Forage Simulation) 2026

- Completed a simulated enterprise software engineering program covering backend systems, data handling, debugging, and system architecture.

PROJECTS

CloudForge — DevOps & Cloud Platform — 2026

Node.js · Docker · Kubernetes · Terraform · AWS · GitHub Actions · PostgreSQL · Gemini API

- Built CI/CD pipelines and backend infrastructure using Docker, Kubernetes, Terraform, and GitHub Actions.
- Provisioned AWS infrastructure as code (S3, DynamoDB, IAM) with Terraform and LocalStack.
- Integrated Gemini API for automated deployment-log analysis; hardened with input validation, rate limiting, parameterized queries, and non-root containers.

ELIVORA — AI Voice & Vision Desktop Assistant — 2026

Python · Gemini Live API · REST APIs · AsyncIO · OpenCV · PyAudio

- Built a real-time AI assistant combining voice interaction, computer vision, and API-driven automation.
- Designed asynchronous pipelines with Python AsyncIO for concurrent audio, video, and AI processing.
- Implemented function-calling for application control, file operations, messaging, and web information retrieval.

NTTF Smart College Communication Platform — 2024 – 2025

Flutter · Next.js · SQL · AI APIs · Authentication

- Built and maintained a production platform used by 800+ users for teacher–parent communication, as sole developer.
- Implemented authentication, database workflows, and multilingual support across Kannada, English, Tamil, and Telugu.

Auraa Movies — Content Platform — 2025

Node.js · Next.js · React.js

- Independently built and launched a content platform that reached 4,000+ users within 2 days and retained 3,000+ recurring users.

EDUCATION

NTTF (Nettur Technical Training Foundation), BTC Bengaluru — Diploma in Computer Technology & IT Infrastructure, 5th Semester (In Progress)

BGS High School, Karnataka — 10th Standard, Completed 2024

CERTIFICATIONS

- AWS Academy Graduate — Cloud Operations
- CCNA: Enterprise Networking, Security, and Automation — Cisco Networking Academy
- Oracle Certified Foundations Associate
